

AERO PRECISION SIGNS REPRESENTATION AGREEMENT WITH WESTWIND TECHNOLOGIES

Livermore, CA - February 16, 2012- Aero Precision announced a new Partnership Agreement with WestWind Technologies, Inc. (WTI). The Partnership and Re-Sale Representation Agreement will extend to Aero Precision's current worldwide fleet support by adding the H-60/S-70 External Hoist Mission Kit to its extensive line of products on that platform.

The H-60/S-70 External Hoist Mission Kit carries many benefits to the H-60/S-70 user community. Not only will it mount to any H-60/S-70 aircraft equipped with ESSS hard points, but it only weighs 109 lbs and is also compatible with all government-approved hoists. The lightweight hoist arm and support frame are cost-effective and can be mounted in 20 minutes, allowing for rapid transfer between aircraft and utilization only when required by the mission. Installation of a standard electrical "A" Kit is the only aircraft modification required. "We are excited to work with Aero Precision to deliver our external hoist products, which are already in service with the U.S. Army. We are confident Aero Precision will maintain the level of service and support that that our quality products represent in the international market" says Angelo Bocchino, WestWind Business Development Director.

About WestWind:

WestWind Technologies, Inc. (www.westwindcorp.com) is a privately-held small business with corporate headquarters in Huntsville, Alabama. Since its founding in 1999, WestWind has been providing both military and commercial customers with solid performance and unparalleled response times. The core capabilities offered by WestWind are: engineering, manufacturing, logistics, as well as modification and integration. With primary corporate operations located just minutes from Redstone Arsenal and hangar operations on the Huntsville International Airport, WTI holds ISO 9001:2008 and AS9100:2004 Rev B.

About Aero Precision:

Aero Precision is a leader in aerospace distribution and services and a premier worldwide stocking distributor of aircraft OEM parts. With 20 years of reliability, quality products and unparalleled customer service, Aero Precision facilitates spare part purchasing, repair coordination and aircraft maintenance program management using a unique logistic support model to source military aircraft solutions for the US Government and over 60 allied military forces. Aero Precision has sole stocking distribution agreements and Channel Partnerships with Honeywell, Hamilton Sundstrand, Crane Aerospace, Texstars, CEF, Curtiss-Wright, Parker, Woodward, Hupp, Otto Instruments, and additional strategic OEM partners for various product lines.
