Honeywell Defense & Space Signs New Rotary Wing Distributor Agreement with Aero Precision

Press Release

Livermore, CA - Aero Precision Industries announced a new world wide rotary wing stocking distributor agreement with Honeywell Defense and Space. The new agreement allows all international military users to meet their rotary wing logistics needs on multiple platforms, including the UH-60 (S70), MH-60, HH-60 and SH-60. It also supplements Aero Precision's current fixed wing agreement by providing stocking distribution for all Honeywell fixed and rotary wing military aircraft products worldwide.

According to Mike Madden, VP, Sales, Helicopter and Surface Systems, Honeywell Defense and Space, "The Aero Precision agreement will increase our joint market penetration worldwide for the helicopter market, with a focus on Black Hawk and Seahawk. Additionally, customer satisfaction will be enhanced through Aero Precision's well known customer service focus."

As a stocking distributor, Aero Precision has been selling Honeywell products since 1994. "This new rotary wing agreement reinforces our commitment to Honeywell and to helicopter customers around the world who operate Black Hawks, Seahawks and Pave Hawks. The agreement also gives us the ability to better serve our customers' fixed and rotary wing needs, providing a very effective FMS alternative." explains Evren Ergin, President of Aero Precision.

About Aero Precision Industries:

Aero Precision is a leading worldwide aerospace stocking distributor and has been selling OEM products and services for 16 years. Aero Precision sources all military aircraft part requirements under its unique logistics support model. In addition to Honeywell, Aero Precision has sole stocking distribution agreements with Hamilton Sundstrand, Crane Aerospace, Textstars and other strategic OEM partners.
