

USAF TCTO # 1C-130-2095

Release Date: Oct. 16, 2012

USAF TCTO # 1C-130-2096

Release Date: Oct. 16, 2012

Antiskid Valve

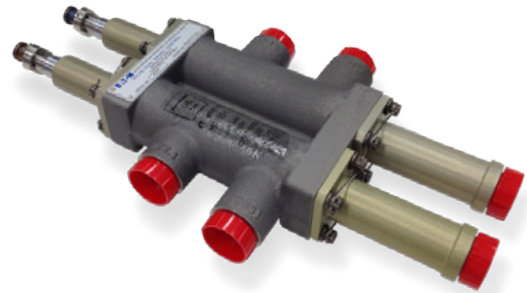

Fault Display Unit

Brake Control Unit

Wheel Speed Transducer

3000 psi Brake Metering Valve

- ▶ Tested and approved on both steel and carbon brakes
- ▶ Fault Display Unit (FDU) provides visual fault indication for quick troubleshooting
- ▶ Increases braking efficiency and lengthens brake life
- ▶ Digital Mark IV design eliminates Mark II analog obsolescence issues
- ▶ Standard on all J-models, and now available for B/E/H-models

- ▶ Higher brake pressure improves dry braking performance
- ▶ New valve provides higher reliability
- ▶ Controls main metering valve/antiskid valve
- ▶ Regulates the pressure applied to the brakes
- ▶ Provides brake force feedback to pilot
- ▶ No mounting/installation changes required for the new valve
